

Signing in to the extranet

You have a Microsoft Office 365 or Microsoft Live account

If you have a Microsoft Office 365 or Microsoft Live account, then you *do not need* a separate login to sign in to the FEB extranet. You can use your own Office 365 account and password to sign in to the FEB extranet.

The first time you sign in with your account, Microsoft will ask you to share it with FEB. Click Accept.

You *do not have* a Microsoft Office 365 or Microsoft Live account

If you do not have an Office 365 or Microsoft Live account, it is possible to create a Microsoft guest account. Click [Create Microsoft guest account](#).
